About me

Dr. Shahadat Hussain is a Mechanical Engineering researcher specializing in 3D printing of carbon fiber-reinforced polymer composites and metamaterial structures, including cubes and beams. His experimental research focuses on flexural and compression testing, mechanical characterization, and structural performance of additively manufactured composite materials for advanced engineering applications.

The study encompasses the 3D printing of TPMS cubes and beams utilizing FFF, SLA, and hybrid manufacturing methods, along with the fabrication of green steel via FFF additive manufacturing techniques, and the evaluation of interpenetrating phase composite (IPC) TPMS beams through four-point flexural testing.
